

**Welcome to  
VMD 105**

I'm currently a second-year student taking this class due to an interest in pursuing digital media. Career goals would be finding opportunities outside college in order to gain experience and build a resume. Typefaces used in this document are Courier New and Berlin Sans.

## **Introduction**

## **To Me**

First project from this class was creating a poster based on any theme using pictures and type as the foreground. My project was fantasy-esque which used a character on the center of the foreground.

**Raster**

---

**Photoshop**

---

Illustrator was harder than photoshop due to using strokes rather than pixels from an image. Creating objects rather than grabbing on the internet took some time to manage. Even though problems arose, it worked in the end.

**Vector**

---

**Illustrator**

---

*Beware*

Everything worked with this program such as animating the character and setting up scenes. It took the most time from the programs and I made my first ever animated short.

**Time Media**

**Animate**
